Date: 2/5/26

Pt: James O'Brien
DOB: 12/17/83
Ins: Anthem BCBS
ID#: ANT-XK7829014

Subjective:
Pt presents for f/u. Reports mood "somewhat better" since starting Lexapro 10mg 3 wks ago. Still having trouble w/ motivation + energy. Sleep improved - now getting ~6 hrs (was 3-4). Appetite still poor.
Denies SI/HI. No side effects from medication.

Objective:
- Appearance: casually dressed, fair hygiene
- Affect: constricted but reactive
- Speech: normal rate/volume
- Thought process: linear, goal-directed
- PHQ-9: 14 (was 21 on 1/15)

Assessment:
MDD recurrent moderate (F33.1) - improving on current regimen

Plan:
- Continue Lexapro 10mg, consider increase to 20mg at next visit if partial response continues
- Continue weekly therapy w/ Dr. Patel
- f/u in 4 weeks
- Labs: TSH, CBC if not done recently

- Dr. R. Whitfield, MD
